music reviews/shopping ideas

After seeing Blackmore's Night in NYC this past Halloween I have also gone back to re-evaluate their latest disc Secret Voyage. It seems that Candice Night's voice has finally grown into her vision of Contemporary Renaissance Stevie Nicks Sex Symbol Rock Chick and she's laid down the law with her husband, and everyone's favorite man in tights, Ritchie Blackmore. To see them obviously having fun on stage was a far departure from Blackmore's old Deep Purple/Rainbow days and the playing is really top notch. Do yourself a favor and check out "Locked within the Crystal Ball" on You Tube and you'll know exactly what I mean. And don't miss "Peasants Promise" on the disc. It combines everything that Blackmore's Night has been striving for over the past ten years.
